Subject Index of Volume 137

Acid complexes
  reactivity of Fe(III) complex of gallic acid, 151
Alkyl complexes
  interaction of metal ions with allopurinol derivatives; preparation and structural characterization of methylmercury(II) complexes, 181
Amine complexes
  biological activity of Pt complexes containing chiral centers on N or C atoms of chelate diamine ring, 45
  chemical properties of rare Pt metal complexes having antitumor activity, 63
  crystal structure of heteronuclear Pt_2CuL_4 complex of 1-methyluracil, $Cu[Pt(NH_3)_2(C_5H_5N_2O_2)_2]_2SO_4 \cdot 8H_2O$, 189
  doxorubicin–Pt(II) complex; chemistry and antitumor activity, 123
  cisplatin toxicity; effects on phagocyte functions, 99
  cytostatic activity of five-coordinate Pt(II) complex; preliminary results, 53
  molecular mechanics modeling of interaction of *cis*-diammine- and *cis*-diamineplatinum(II) complexes with A-DNA fragment d(GCC): d(CGG), 15
  recent trends in synthesis of cisplatin analogs, 57
Ammine complexes
  effect of benzaldehyde on Tb fluorescence enhancement in human NHIK 3025 cells treated with *cis*-dichlorodiammineplatinum(II), 105
  reduction of *cis*-dichlorodiammineplatinum-induced cell inactivation by methionine, 115
  therapeutic efficacy of various dosages and modalities of adminstration, 91
  tumor animal models used for evaluating antineoplastic activity of Pt coordination complexes, 39
Anthracycline complexes
  metal anthracycline complexes as new class of anthracycline derivatives, 119
Antibiotic complexes
  metal anthracycline complexes as new class of anthracycline derivatives, 119
Antitumor activity
  Au(I) derivatives of heterocycles, 81
  biological activity of Pt complexes containing chiral centers on N or C atoms of chelate diamine ring, 45
  chemical properties of rare Pt metal complexes having antitumor activity, 63
  coordination metal complexes of Rh(I), Ir(I) and Ru(II); recent advances on antimetastatic activity on solid mouse tumors, 69
  cytostatic activity of five-coordinate Pt(II) complex; preliminary results, 53
  dithiocarbamates as antagonists of cisplatin toxicity, 109
  doxorubicin–Pt(II) complex; chemistry and antitumor activity, 123
  effect of benzaldehyde on Tb fluorescence enhancement in human NHIK 3025 cells treated with *cis*-dichlorodiammineplatinum(II), 105
  exploitation of Pt for human solid tumors, 59
  metal anthracycline complexes as new class of anthracycline derivatives, 119
  NMR and FT-IR conformational studies of 8-substituted guanine nucleosides and nucleotides and their metal adducts and cancer, 195
  Pd(II), Pt(II) and Rh(III) complexes with 3,5-dimethyl-1-(4′,6′-dimethyl-2′-pyrimidyl)-pyrazole, potential anti-cancer agent, 161
  preclinical studies of cisplatin analogs, 35
  reaction of *cis*-$Ru^{II}(DMSO)_4Cl_2$ with DNA and with some of its bases in aqueous solution, 19
  reaction of Pt(II) antitumor agents with sulfhydral compounds and implications for nephrotoxicity, 125
  recent trends in synthesis of cisplatin analogs, 57
  therapeutic efficacy of various dosages and modalities of administration, 91
  tumor animal models used for evaluating antineoplastic acitvity of Pt coordination complexes, 39
Antitumor complexes
  toxicity, mutagenicity and drug resistance in *Escherichia coli* treated with Pt antitumor compounds, 25

Bacteria
  mutagenic effects of Rh(I) and Ru(II) organometallic complexes in bacteria, 31
  toxicity, mutagenicity and drug resistance in *Escherichi coli* treated with Pt antitumor compounds, 25
Bidentate ligand complexes
  coordination metal complexes of Rh(I), Ir(I) and Ru(II); recent advances on antimetastatic activity on solid mouse tumors, 69
  cytostatic activity of five-coordinate Pt(II) complex; preliminary results, 53
  dithiocarbamate complexes of Rh(III), Ir(III), Pd(II) and Pt(II), 73
  Pd(II), Pt(II) and Rh(III) complexes with 3,5-dimethyl-1-(4′,6′-dimethyl-2′-pyrimidyl)-pyrazole, potential anti-cancer agent, 161

© Elsevier Sequoia/Printed in Switzerland

preclinical studies of cisplatin analogs, 35

Calcium complexes
Ca complexation to penicillin V, 137
Chelate complexes
biological activity of Pt complexes containing chiral centers on N or C atoms of chelate diamine ring, 45
coordination metal complexes of Rh(I), Ir(I) and Ru(II); recent advances on antimetastatic activity on solid mouse tumors, 69
cytostatic activity of five-coordinate Pt(II) complex; preliminary results, 53
dithiocarbamate complexes of Rh(III), Ir(III), Pd(II) and Pt(II), 73
Mössbauer and EPR spectroscopic study of Fe–EDTA system, 173
Pd(II), Pt(II) and Rh(III) complexes with 3,5-dimethyl-1-(4′,6′-dimethyl-2′-pyrimidyl)-pyrazole, potential anti-cancer agent, 161
preclinical studies of cisplatin analogs, 35
Cisplatin complexes
cisplatin toxicity; effects on phagocyte functions, 99
recent trends in synthesis of cisplatin analogs, 57
Cobaloxime complexes
reaction between aquanitrocobaloxime and thiourea in dioxane–water mixtures, 167
Cobalt complexes
reaction between aquanitrocobaloxime and thiourea in dioxane–water mixtures, 167
Copper complexes
crystal and molecular structure of Cu(II)–glycine-hydroxamic acid complex, 145
crystal structure of heteronuclear Pt_2CuL_4 complex of 1-methyluracil, $Cu[Pt(NH_3)_2(C_5H_5N_2O_2)_2]_2SO_4 \cdot 8H_2O$, 189
Creatinine complexes
Pt(II) and Pd(II) complexes of creatinine; Pt blues, 131
Crystal structure(s)
Ca complexation to penicillin V, 137
of Cu(II)–glycinehydroxamic acid complex, 145
of $Cu[Pt(NH_3)_2(C_5H_5N_2O_2)_2]_2SO_4 \cdot 8H_2O$, 189
of methylmercury(II) complexes, 181
purine–nucleotide metal complexes, 87
Cyanide complexes
cyanide scavengers; kinetics of reaction of Rh(III)–tetrakis(4-sulfonatophenyl)porphyrin with cyanide and hydrogen cyanide, 209

Dithiocarbamate complexes
dithiocarbamates as antagonists of cisplatin toxicity, 109
DNA complexes
investigations of Zn(II) complexes with DNA/RNA bases by means of quantum chemical calculations, 203
molecular mechanics modeling of interaction of *cis*-diammine- and *cis*-diamineplatinum(II) complexes with A-DNA fragment d(GCC): d(CGG), 15
reaction of *cis*-$Ru^{II}(DMSO)_4Cl_2$ with DNA and with some of its bases in aqueous solution, 19

Enzyme complexes
interaction of metal ions with allopurinol derivatives; preparation and structural characterization of methylmercury(II) complexes, 181

Gold complexes
Au(I) derivatives of heterocycles, 81

Heterocycle complexes
Au(I) derivatives of heterocycles, 81
Heteronuclear complexes
crystal structure of heteronuclear Pt_2CuL_4 complex of 1-methyluracil, $Cu[Pt(NH_3)_2(C_5H_5N_2O_2)_2]_2SO_4 \cdot 8H_2O$, 189
Hydrogenosulfide complexes
reaction of Pt(II) antitumor agents with sulfhydral compounds, and implications for nephrotoxicity, 125
Hydroxamate complexes
crystal and molecular structure of Cu(II)–glycine-hydroxamic acid complex, 145

Iridium complexes
coordination metal complexes of Rh(I), Ir(I) and Ru(II); recent advances on antimetastatic activity on solid mouse tumors, 69
dithiocarbamate complexes of Rh(III), Ir(III), Pd(II) and Pt(II), 73
Iron complexes
chemistry of Fe in biosystems; complex formation between Fe(III) and tartaric acid; 'core + link' mechanism, 155
Mössbauer and EPR spectroscopic study of Fe–EDTA system, 173
reactivity of Fe(III) complex of gallic acid, 151

Kinetics and mechanism
chemistry of Fe in biosystems; complex formation between Fe(III) and tartaric acid; 'core + link' mechanism, 155
reaction between aquanitrocobaloxime and thiourea in dioxane–water mixtures, 167
of reaction of Rh(III)–tetrakis(4-sulfonatophenyl)-porphyrin with cyanide and hydrogen cyanide, 209
reactivity of Fe(III) complex of gallic acid, 151
studies on reduction of cytochrome *c*; reaction with organic oxy-compounds, 139

Mercapto-amino acid complexes
vibrational spectra of captopril (SQ 14,225: 1-(D-3-mercapto-2-methylpropionyl)-L-proline) and synthesis of 1:1 coordination compound of captopril with Zn(II) and characterization by vibrational spectra, 177
Mercury complexes
interaction of metal ions with allopurinol derivatives; preparation and structural characterization of methylmercury(II) complexes, 181
Metal complexes
metal anthracycline complexes as new class of anthracycline derivatives, 119
NMR and FT-IR conformational studies of 8-substituted guanine nucleosides and nucleotides and their metal adducts and cancer, 195
purine–nucleotide metal complexes, 87
Methionine complexes
reduction of *cis*-dichlorodiammineplatinum-induced cell inactivation by methionine, 115

NMR studies
^{31}P NMR investigation of fourteen self-complementary oligodeoxyribonucleotides (8-*mer* to 14-*mer*) treated with Pt complexes; downfield ^{31}P NMR signal characteristic of anticancer drugs is observed only for molecules with adjacent G residues, 1
Nucleobase complexes
crystal structure of heteronuclear Pt_2CuL_4 complex of 1-methyluracil, $Cu[Pt(NH_3)_2(C_5H_5N_2O_2)_2]_2SO_4 \cdot 8H_2O$, 189
Nucleoside complexes
NMR and FT-IR conformational studies of 8-substituted guanine nucleosides and nucleotides and their metal adducts and cancer, 195
reactivity of novel *cis*-Pt(II) complexes with nucleosides, 75
Nucleotide complexes
NMR and FT-IR conformational studies of 8-substituted guanine nucleosides and nucleotides and their metal adducts and cancer, 195
^{31}P NMR investigation of fourteen self-complementary oligodeoxyribonucleotides (8-*mer* to 14-*mer*) treated with Pt complexes; downfield ^{13}P NMR signal characteristic of anti-cancer drugs is observed only for molecules with adjacent G residues, 1
purine–nucleotide metal complexes, 87
reaction of *cis*-$Ru^{II}(DMSO)_4Cl_4$ with DNA and with some of its bases in aqueous solution, 19

Palladium complexes
dithiocarbamate complexes of Rh(III), Ir(III), Pd(II) and Pt(II), 73
Pd(II), Pt(II) and Rh(III) complexes with 3,5-dimethyl-1-(4′,6′-dimethyl-2′-pyrimidyl)-pyrazole, potential anti-cancer agent, 161
Pt(II) and Pd(II) complexes of creatinine; Pt blues, 131
Penicillin complexes
Ca complexation to penicillin V, 137
Photolysis
photoinduced reduction of NADP using bipyridinium salts as electron carriers, 135
Platinum complexes
biological activity of Pt complexes containing chiral centers on N or C atoms of chelate diamine ring, 45
chemical properties of rare Pt metal complexes having antitumor activity, 63
cisplatin toxicity; effects on phagocyte functions, 99
crystal structure of heteronuclear Pt_2CuL_4 complex of 1-methyluracil, $Cu[Pt(NH_3)_2(C_5H_5N_2O_2)_2]_2SO_4 \cdot 8H_2O$, 189
cytostatic activity of five-coordinate Pt(II) complex; preliminary results, 53
dithiocarbamate complexes of Rh(III), Ir(III), Pd(II) and Pt(II), 73
dithiocarbamates as antagonists of cisplatin toxicity, 109
doxorubicin–Pt(II) complex; chemistry and antitumor activity, 123
effect of benzaldehyde on Tb fluorescence enhancement in human NHIK 3025 cells treated with *cis*-dichlorodiammineplatinum(II), 105
exploitation of Pt for human solid tumors, 59
molecular mechanics modeling of interaction of *cis*-diammine- and *cis*-diamineplatinum(II) complexes with A-DNA fragment d(GCC): d(CGG), 15
^{31}P NMR investigation of fourteen self-complementary oligodeoxyribonucleotides (8-*mer* to 14-*mer*) treated with Pt complexes; downfield ^{31}P NMR signal characteristic of anticancer drugs is observed only for molecules with adjacent G residues, 1
Pd(II), Pt(II) and Rh(III) complexes with 3,5-dimethyl-1-(4′,6′-dimethyl-2′-pyrimidyl)-pyrazole, potential anti-cancer agent, 161
preclinical studies of cisplatin analogs, 35
Pt(II) and Pd(II) complexes of creatinine; Pt blues, 131
reaction of Pt(II) antitumor agents with sulfhydral compounds and implications for nephrotoxicity, 125
reactivity of novel *cis*-Pt(II) complexes with nucleosides, 75
recent trends in synthesis of cisplatin analogs, 57
reduction of *cis*-dichlorodiammineplatinum-induced cell inactivation by methionine, 115
therapeutic efficacy of various dosages and modalities of administration, 91
toxicity, mutagenicity and drug resistance in *Escherichia coli* treated with Pt antitumor compounds, 25

tumor animal models used for evaluating antineoplastic activity of Pt coordination complexes, 39
Polydentate ligand complexes
Mössbauer and EPR spectroscopic study of Fe–EDTA system, 173
Porphyrin complexes
cyanide scavengers; kinetics of reaction of Rh(III)–tetrakis(4-sulfonatophenyl)porphyrin with cyanide and hydrogen cyanide, 209
Protein complexes
kinetic studies on reduction of cytochrome *c*; reaction with organic oxy-compounds, 139
Purine complexes
purine nucleotide–metal complexes, 87

Reduction
of *cis*-dichlorodiammineplatinum-induced cell inactivation by methionine, 115
kinetic studies on reduction of cytochrome *c*; reaction with organic oxy-compounds, 139
Rhodium complexes
coordination metal complexes of Rh(I), Ir(I) and Ru(II); recent advances on antimetastatic activity on solid mouse tumors, 69
cyanide scavengers; kinetics of reaction of Rh(III)–tetrakis(4-sulfonato)porphyrin with cyanide and hydrogen cyanide, 209
dithiocarbamate complexes of Rh(III), Ir(III), Pd(II) and Pt(II), 73
mutagenic effects of Rh(I) and Ru(II) organometallic complexes in bacteria, 31
Pd(II), Pt(II) and Rh(III) complexes with 3,5-dimethyl-1-(4′,6′-dimethyl-2′-pyrimidyl)-pyrazole, potential anti-cancer agent, 161
RNA complexes
investigations of Zn(II) complexes with DNA/RNA bases by means of quantum chemical calculations, 203

Ruthenium complexes
coordination metal complexes of Rh(I), Ir(I) and Ru(II); recent advances on antimetastatic activity on solid mouse tumors, 69
mutagenic effects of Rh(I) and Ru(II) organometallic complexes in bacteria, 31
photoinduced reduction of NADP using bipyridinium salts as electron carriers, 135
reaction of *cis*-$Ru^{II}(DMSO)_4Cl_2$ with DNA and some of its bases in aqueous solution, 19

Tartaric acid complexes
chemistry of Fe in biosystems; complex formation between Fe(III) and tartaric acid; 'core + link' mechanism, 155
Thiourea complexes
reaction between aquanitrocobaloxime and thiourea in dioxane–water mixtures, 167
Toxicity
cisplatin toxicity; effects on phagocyte functions, 99
mutagenicity and drug resistance in *Escherichia coli* treated with Pt antitumor compounds, 25

Zinc complexes
investigations of Zn(II) complexes with DNA/RNA bases by means of quantum chemical calculations, 203
photoinduced reduction of NADP using bipyridinium salts as electron carriers, 135
vibrational spectra of captopril (SQ 14,225: 1-(D-3-mercapto-2-methylpropionyl)-L-proline) and synthesis of 1:1 coordination compound of captopril with Zn(II) and characterization by vibrational spectra, 177
